Subject Index

Acidity, in humic lakes 343
Adsorption, of mutagens by humic acid 305
Age of humic matter, by radiocarbon dating 405
Aliphatic structures, in peat fulvic acids 193
ATPase activity in plant roots, effect of soil humus 355

Binding strength of copper to humic acid-like polymer 271
Bioaccumulation of cadmium by fish, influence of humus and pH 253
Bioaccumulation of organic micropollutants, effect of aquatic humus 399
Bioavailability of lead and cadmium effect humic substances 219
Biological effects, of humus at various pH towards Daphnia magna 387

C-13 NMR, characterisation of humic substances fractionated by MIBK 185
C-13 NMR, of humic acid like polymers 201
C-13 NMR, of peat fulvic acids in solution 193
C-13 NMR, of Suwannee River fulvic acid in solution 175
C-13 NMR, structural characteristics of lignins and humic substances 165
Characterisation, of humic substances from blue lake sediment 107
Chlorination, formation of cyano-compounds from humic acid 329
Coagulation of humic substances, temporary disaggregation 481
Coastal aquatic biotopes, occurrence of humic matter 469
Coastal marine sediments, occurrence of humic matter 477
Complexation, of cadmium and zinc by aquatic humus 281
Complexation, of cadmium by humus, effect on bioaccumulation in fish 253
Complexation, of chlorophenolics and resin acids by aquatic humus 291
Complexation, of copper and iron by melanins from soil fungi 241
Complexation, of copper by humic acid like polymer 271
Complexation, of iron and calcium by soil humic acids, effect on wetting properties 267
Complexation, of iron by aquatic humus 275
Complexation, of iron by fulvic acid characterised by Mossbauer and EPR spectroscopy 229
Complexation, of lead and cadmium by humic substances 219
Complexation, of soil humic acid to tyrosinase 365
Complexation, of transuranics by humic substances 213
Compost, influence on soil humic matter compositive 459
Coupling, of 2,4-dichlorophenol to humic substances 367
Crop yield increase, after treatment with leonardite extracts 491
Crystal formation by humic substances 129
Cyano compounds formed during chlorination of humic acid 329

Daphnia magna, biological effects of humus under acidified condition 387
Degradation, of soil humic acids by bacteria 423
Disaggregation, of coagulated humic substances 481
Dissolved organic carbon, changes after volcanic eruption 189
Drinking water disinfection, products from reaction with humic substances 315

EDA complexes, between nitrogen heterocycles and humic acid 297
Electrophoresis, application to humic substances 85
Extraction, of peat humic substances 39
Extraction, of soil fulvic acid 3

Fluorescence excitation spectra, of fulvic acids 157
Fluorescence measurements, of aquatic humus, avoidance of quenching effects 163
Fluorescent properties, of photic zone water 149

Forest humus, characterisation of humification profile 163

Fractionation, of humic acids by 2 D electrophoresis 85

Fractionation, of humic substances by isoelectric focusing 89

Gel chromatography, of humic acids 55

Groundwater, occurrence of humic substances 467

Humic-acid like polymers, synthesis and C-13 NMR characterisation 201

Humic-like polymers, formation from pyrogallol and glycine 435

Humification, degree in manures 457

Humification, of rice straw in aerobic and submerged rice soil 431

Humus profiles, in forest soils 111

Humus types, differentiation using soil pyrograms 97

Inhibition of tyrosinase activity, by humic acids 365

Iodine, occurrence in humic acids from marine sediments 341

Ion-exchange method, for speciation of cadmium and zinc by humus-rich water 281

Ion balance, in humic lakes 343

Ion uptake, by plant roots, stimulation by soil humus 355

Iron and calcium humates, wetting properties 267

Isoelectric focusing, application to separation and analysis of humic substances 89

Isolation, of aquatic humus by ultrafiltration 47

Lignins, residual fragments in humic substances by C-13 NMR 165

Microbial activity in soil, effect of humic extracts 379

Microbial decomposition, of humus 413

Microbial degradation, of soil humic acids 423

Microbial transformation, of soil humic substances 419

Mitochondrial respiration and phosphorylation, effects of humic substances 347

Modification, of soil humic acids by composted municipal refuse 459

Molecular size distribution, of humic substances 27

Molecular size distribution, of peat humic substances 39

Molecular size fractionation, of aquatic humus by HPLC 75

Mutagens, effect of humic acid on their mutagenicity 305

Optical properties, of aquatic humus affected by irradiation 139

Organic micropollutants, complexation/adsorption by aquatic humus 13

Organic micropollutants, influence of humus on bioaccumulation 399

Oxidoreductases, inhibition by humic substances 367

Photochemical reactions, of fresh aquatic humus 139

Photodegradation of pesticides, effect of humic substances 335

Photosensitizing effect, of humic substances 335

Plant components, in soil humic acids as analysed by pyrolysis-GC 115

Properties of fulvic acids, effect of extraction procedure 3

Pyrolysis-gas chromatography, characterisation of soil humic matter 379

Pyrolysis-gas chromatography, multifactorial analysis for characterisation of humus 97

Radiocarbon dating, for determination of the soil organic fraction turnover 405

Radioiodination, of humic substances fractions 65

Reduction of humic substances, by diborane 121

Removal, of humic substances from water 483

Reverse-phase HPLC, retention behavior of Suwannee River fulvic acid 67

Seasonal variation, in composition and properties of aquatic humus 13

Size exclusion chromatography, of aquatic humus 75

Sludge, from olive mill waste water, humic matter characterisation 445

Solubilization, of hydrophilic compounds in water by humic acid 311

Spectroscopic characterisation, of humic size fractions by UV-VIS spectroscopy 27
Surface active properties, of humic acids 55

Transformation and incorporation, of humic substances at sediment-water interface 409
Tillage, effect on soil humic matter properties 453

Ultrafiltration, of lysimeter waters from forest soils 47
Ultrafiltration, of soil humic substances 65
UV/VIS spectra of fulvic acid, comparison with fluorescence excitation spectra 157
